

Spin-Aid™

HERBICIDE

Sugarbeet*

Performance in the Field

Dr. Tom Peters (NDSU/UMN), provided some photos, and insight about adding Spin-Aid, to the post emergence application, for control of Kochia that emerged simultaneously with sugarbeet plants in Felton, Minnesota. Photos taken on May 11 and May 22, 5 days after second herbicide application was made.

05/11/24

Situation:

- Sugar beet full cotyledon
- Kochia <dime-size
- No other weeds
- Temperature <80F

Dr's Recommendation:

Spin-Aid 24(c) Program

Application A:

Spin-Aid 12 oz + ethofumesate 4 oz + MSO

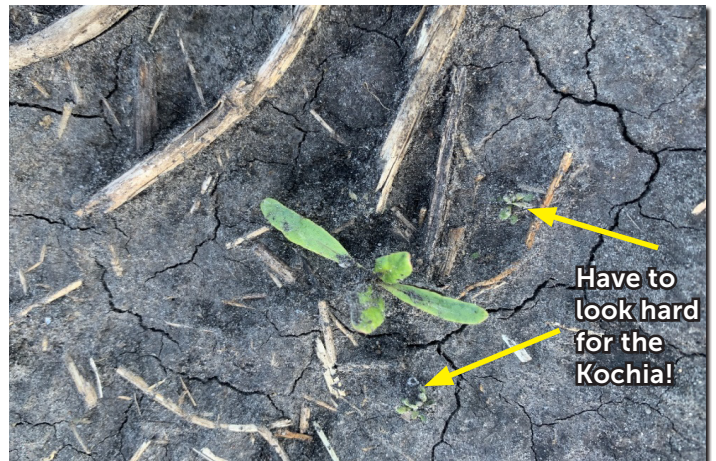

05/22/24 - 5 Days After Second Application (C)

Situation:

- Cold, wet conditions
- Sugarbeet slow growth
- Kochia growing well

Application C:

Spin-Aid 24 oz + ethofumesate 4 oz + RUPM3 25oz

* FIRA 24(c) Special Local Needs Label in Minnesota and North Dakota. Please read label prior to use.
